

Higher Stars

This town is only wants to make you stronger

You know we're lovin' you
Someday you know your gonna be a star

So tell my peoples that we good
We did everything we could
We on our way to the top
Ain't no stoppin' us

Trust

We will never let you down
We fall down chances are made
When the spotlight starts to fade
We will still be here

Here

We have been here from the start
All it takes is just some heart
All it takes is just a spark
Then we outta here

Said we outta here
So far gone
Baby on
Higher planes
Space shuttle trips
Holdin' up the stratosphere

This town is only wants to make you stronger

You know we're lovin' you
Someday you know you're gonna be a star

And right here is how you're gonna take it higher
You know we're lovin' you
You know you're going to make it far-far-far
That higher stars

And I
Wanna fly high to the sky
So far high above the clouds
Tell them haters that we out
We made it this far
Ain't no turnin' back
Mom said don't look back
Pop said don't look back
So I won't
Look where we is at

hey hey

We have just arrived
Amongst the stars
We reside
Take it all in stride
We decide
What we do today

We gon' live
The rest of our lives
Just like this
Stars n' all
Anything we want
We can have it all

This town is only wants to make you stronger

You know we're lovin' you
Someday you know you're gonna be a star

And right here is how you're gonna take it higher
You know we're lovin' you
You know you're going to make it far-far-far
That higher stars
